

PRESS RELEASE

Senoko Energy to Deploy Mitsubishi i-MiEV Electric Vehicle as Part of Nationwide Electric Vehicle Test-Bedding Programme

First local genco to participate in national feasibility trial for large-scale EV adoption

Singapore, 25 June 2011 – Singapore’s largest power generation company Senoko Energy today announced its purchase of a Mitsubishi i-MiEV electric vehicle (EV) under the nationwide Electric Vehicle Test-Bedding Programme, launched at an event at the Land Transport Authority (LTA) this morning.

Senoko Energy is the first power generation company in Singapore to purchase the EV under the test-bedding programme. As an early adopter, Senoko Energy will be part of the pioneering batch of EV owners who will be testing the viability of introducing EVs as an alternative form of transport into Singapore.

Mr Brendan Wauters, President & CEO of Senoko Energy, said: “Senoko Energy is excited about participating in the EV Test-Bedding Programme. This is an innovative programme, which could pave the way for a greener form of transport in Singapore. EVs have zero emissions, are quiet, and can be a very suitable transport option for a compact city like Singapore. As an environmentally-conscious company, we are encouraged by the interest in EVs and we are committed to making this test-bedding programme a success.”

The Electric Vehicle Test-Bedding Programme is a joint project between several ministries and statutory boards including A*STAR, Economic Development Board (EDB), Energy Market Authority (EMA), LTA, Ministry of Environment & Water Resources (MEWR), Ministry of Trade and Industry (MTI), National Environmental Agency (NEA), Housing Development Board (HDB) and Spring Singapore. Senoko is the first and only local genco so far to participate in this ongoing trial evaluating the feasibility of large-scale EV adoption in Singapore.
